

intelesens))

The Complete Electrode Expert & Partner

Company Overview

July 2026

Business Overview

- Intelesens is expert in **electrode design and manufacture**
- **Established global presence**, supplying product worldwide
- **World class management team** with a proven track record of success **leading to best-in-class financial profile**
- **20 year + design and manufacture** medical electrode expertise in **world class facility**
- **Experienced R&D engineers, production and quality team** with unrivalled knowledge and expertise in electrode design and manufacture
- **Offering a full-suite service** from concept through design to manufacture that few other companies can match
- Unique features of design and manufacture includes **longest shelf-life of electrodes** on the market
- **Top class performance** in highly regulated MedTech industry, **ISO 13485 certified**
- **Zero non-conformances** from notified body and customer audits, **Zero Recalls** and KPI yield of >98%
- **Highly efficient facility** – 44 full time staff
- **Well-run profitable business**

Highlights

***Profitable business,
poised for
substantial growth***

***Broad client base -
multinationals and
startups***

***Supply products
internationally
including USA,
Europe and SE Asia***

***Impeccable quality
record, expertise
filing FDA 510K and
CE submissions***

Longstanding Relationships with Existing Top Customers & Demonstrated Growth in Recent Years

- Intelesens began operations in 2000 - specific expertise in the application of sensor technologies
- The Company has established a leadership position within the medical sensor industry based on their:
 - Physiological sensor design and development capabilities
 - Unique manufacturing processes for broad range of body worn sensors
- Broad range of product offerings including and Screen-Printed medical electrodes
- Located in modern facility providing R&D, Manufacturing, Logistics and Customer Service functions
- Top class performance in highly regulated MedTech industry
 - ISO13485 certified
 - Zero non-conformances from notified body and customer audits
 - Zero Recalls
- Highly efficient facility with 44 full-time and three part time staff with KPI yield of >98%
- International and blue-chip client list

The Electrode Experts

» 20+ year design and manufacture of medical grade electrode experience

» Experienced R&D engineers, production and quality team with in-depth understanding of the specific requirements for multiple electrode types

» Compliance specialists, building technical documentation to support regulatory approval applications

» Offering a full suite service from concept through design to manufacture

» Experience and expertise that ensures designs put usability at the forefront of client products

Broad patient use

Longest Shelf-life in the market of 5.5yrs

Customisable shape and active area

Optimised form

Technical file generation and design change control

Fully compliant to material regulations

Assembly economies

Key company focus is on developing advanced electrode and sensor technologies that enable the acquisition of physiological signals from the body across a range of medical applications, including:

- Cardiac monitoring
- Prediction of labour onset
- Bioimpedance-based physiological assessment

Unique offering with End-to-End Capabilities from Concept to Commercial Manufacture

Complete offering that few can match

Manufacturing Record

intelesens))

- Manufacturing commercially for over two decades
- Since 2010, over 1.5M+ electrodes manufactured and delivered to our clients
- 100% order fulfilment
- Regulatory authority audits consistently passed (FDA Inspections and ISO 13485 audits)
- Continual improvement and commitment to excellence

The Complete Electrode Expert

World leading electrode supplier

- Developing and manufacturing electrodes for multiple companies worldwide since 2000
- End to end service offering few can match

Cost effective and validated manufacturer

- Delivering excellent electrode design, validated and cost-effective manufacturing processes

Flexible solution to meet client needs

- Whatever a client's requirements, Intelesens have extensive experience supported by accredited in-house facilities to provide customised electrode solution

Supplying the market to the highest quality standards

- Complying to ISO 13485

Manufacturing capacity to meet market needs

- Whatever volume requirements, the business has the capacity and capability to deliver
