

The Complete Electrode Expert & Partner

We understand that every client's product requirements and workflows are unique.

That's why we have created a flexible partnership approach to developing, validating and manufacturing medical electrodes tailored to meet your exacting requirements.

Whether you are a start up at the initial concept stage or a well-established multinational, we have the experience, knowledge and in-house facilities to deliver a cost-effective solution that's right for your business.

Whatever your requirements, we have extensive experience supported by in-house facilities to provide an end-to-end solution.
